EVA SYSTEMS

“Equitable Educational Quality, Data that Transforms, Learning that Lasts”

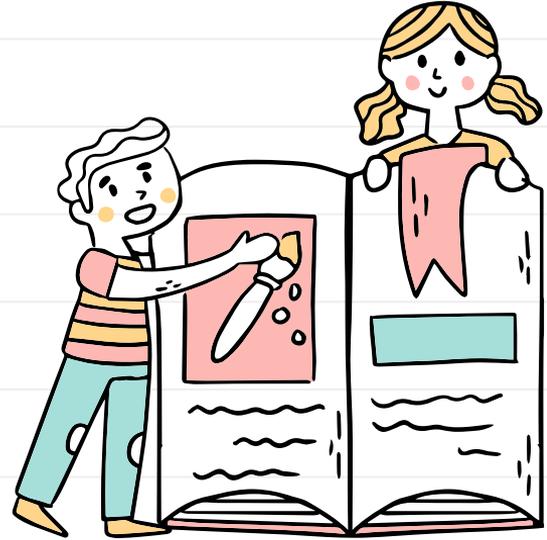

INTRODUCTION

Eva. is a SaaS platform we have developed to transform education from its core. It is not just another learning management system; it is an intelligent ecosystem that connects administrators, teachers, and students in a continuous cycle of teaching, assessment, and personalized improvement.

Our mission is clear: to free teachers from administrative burdens so they can do what they do best—teach; and to empower each student with the tools and data to take ownership of their own learning.

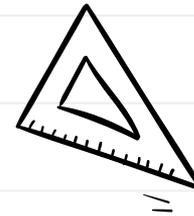

Eva. not only optimizes educational processes but also guarantees quality, equitable, and accessible education for all, creating the foundation for a more just and informed future.

THE CURRENT EDUCATIONAL CHALLENGE

1. Gap in educational quality by socioeconomic level.
2. Administrative overload for teachers (grading and planning).
3. Lack of immediate feedback for students.
4. Difficulty in identifying and supporting struggling students in a timely manner.
5. Limited access to quality and diverse materials.

¿ WHAT IS EVA ?

- Software SaaS (LMS) : Designed for educational institutions.
- Central Objective: Improve the quality of education through data.
- Three Pillars:
 -

OPERATIONAL EFFICIENCY

For Teachers and
Administrators

ADAPTIVE LEARNING

Multimedia digital
content and online
reinforcement tests

EQUITY AND INCLUSION

In access to quality
resources

KEY DIFFERENTIATING FEATURES

STUDENT

- Adaptive Learning
- Metacognition
- Unlimited Resources

TEACHER

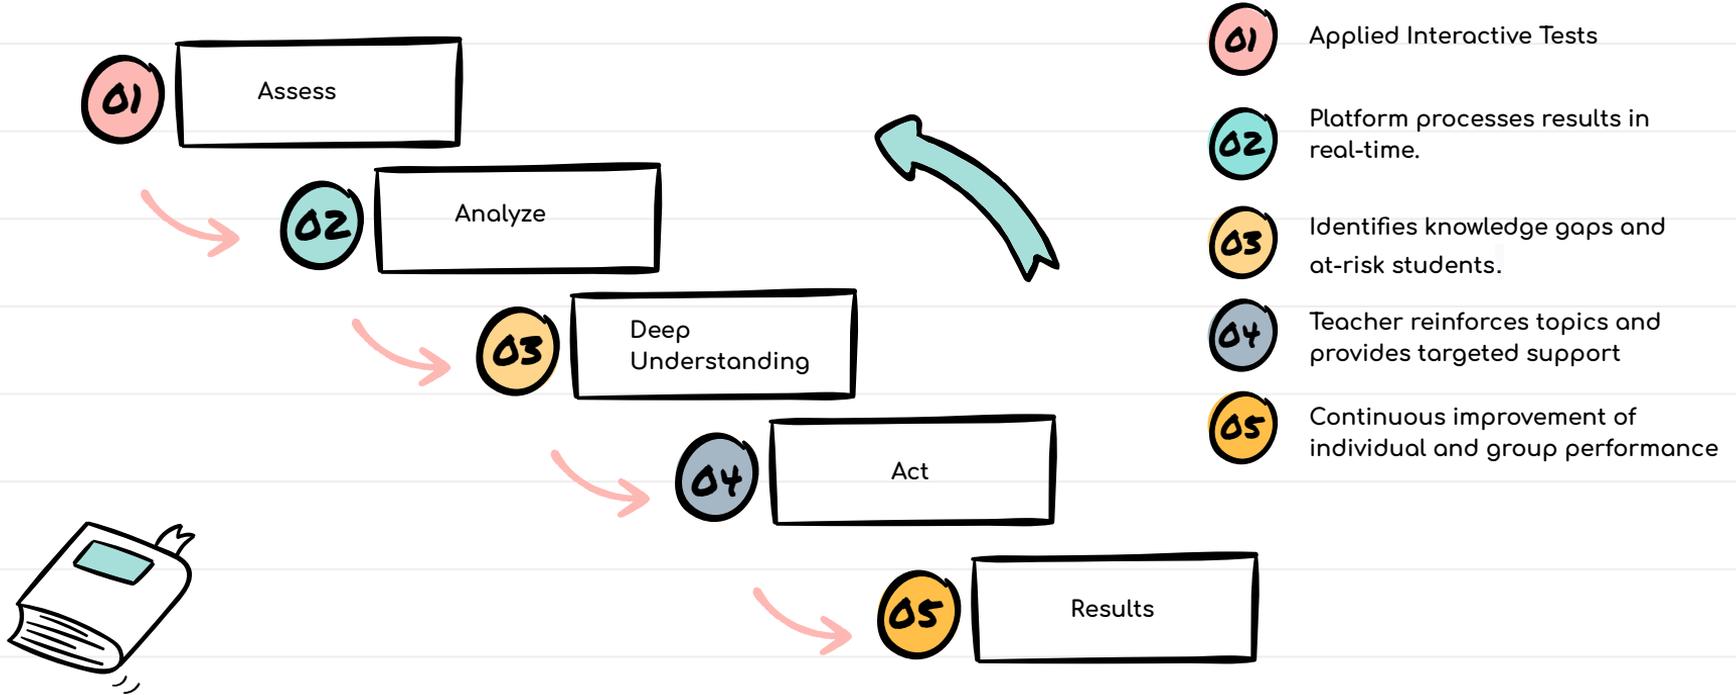

- Time Savings ~ 90%
- Data-Driven Teaching
- Intelligent Planning

ADMINISTRATOR

- Transparency and Control
- Simplified Management

1 - THE VIRTUOUS LEARNING CYCLE

2 - TANGIBLE ADVANTAGES AND BENEFITS

STUDENT

Autonomous learning, immediate feedback, unlimited quality resources, knows their position and progress.

TEACHER

Freedom from administrative load, more didactic teaching, tools for effective support, resource collaboration.

INSTITUTION

Improvement in overall academic results, efficient management, projection of educational innovation.

SOCIETY

Cross-cutting and equitable quality education, independent of socioeconomic context, access to diverse knowledge.

THANKS !
